Software : selenium
Languages : Java, C, C++, Python, Html, CSS 5, JavaScript

PROJECTS UNDERTAKEN

Project: Online Hospital Appointment Booking System

Duration: Oct 2023

Domain: Web Application

Technologies: HTML, CSS

Description:

Developed a web-based application for hospitals to manage patient appointment bookings online. The system allows patients to book appointments with doctors easily through a user-friendly interface. Designed and styled the appointment booking page using HTML and CSS to ensure a clean and responsive layout, improving accessibility and reducing manual scheduling efforts.

Project: Online Bakery Website

Domain: E-commerce | Web Application

Technologies: HTML, CSS, JavaScript

Description:

Built a website for a bakery to showcase and sell baked goods online. Implemented features such as product display with images, quantity selection, and integration with WhatsApp for order placement. Designed the user interface to be mobile-responsive and visually appealing to enhance user experience and boost online sales.
